

CURIS³

Portable, Scalable, and Versatile
Decontamination

Stand Alone Fogging
with Accessories
for Every Situation

The superior Efficacy, Portability, and Versatility of the Original CURIS with the ability to treat multiple spaces in one device. The CURIS³ adaptive design is a versatile suite of interchangeable accessories to meet your needs. Because outbreaks are rarely confined to one space, you need multiple tools in your toolbox to defend your facility's various environments.

One System = multiple tools for your decontamination toolbox

Treat a room from the main fogging nozzle or switch the lever to extension mode & couple with the CURIS...

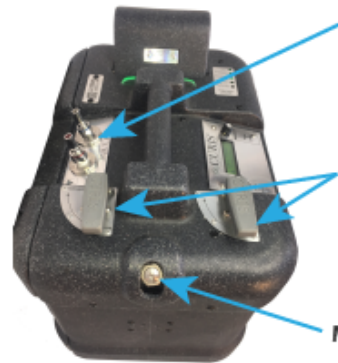

Extension Arm

- * to treat spaces from outside the enclosure
- * to move on from room to room without needing to wait for lower PPM levels, saving time and money

Hand-Held Sprayer

to easily decontaminate open air space that cannot be fogged

Extension Nozzle Ports

Nozzle Levers
switch between
main & extension
mode

Main Nozzle
